American National Adult Reading Test (AmNART)**

<b>Availability:</b>	Please email the author for information about obtaining the instrument: <a href="mailto:ellen.grober@einstein.yu.edu">ellen.grober@einstein.yu.edu</a>
<b>Classification:</b>	<p><b>Supplemental – Highly Recommended:</b> Epilepsy</p> <p><b>Supplemental:</b> Mitochondrial Disease (Mito)</p>
<b>Short Description of Instrument:</b>	<p><b>Purpose:</b> To characterize level of general cognitive function and provide a frame of reference from which to interpret other tests if any are administered.</p> <p><b>Comment:</b> This is an oral reading test containing words with atypical grapheme to phoneme associations making it difficult to pronounce words phonetically. AMNART is selected over other similar measures (i.e., WRAT Reading, WTAR) since it is in the public domain.</p> <p><b>Time Estimate:</b> 5 minutes.</p> <p><b>Primary Dependent Measure:</b> Regression-based IQ Estimate.</p>
