Concussion Vital Signs (CVS)**

Availability:	For Additional information about the Concussion Vital Signs please visit this website: For additional information about the Concussion Vital Signs please click here
Classification:	Supplemental for Traumatic Brain Injury (TBI)
Short Description of Instrument:	<p>CNS Vital Signs is a web-based platform. The CNS Vital Signs battery consists of 7 tests: Verbal Memory (VBM), Visual Memory (VIM), Finger Tapping (FTT), Symbol Digit Coding (SDC), Stroop Test (ST), Shifting Attention Test (SAT) and the Continuous Performance Test (CPT). These tests capture a patient’s composite memory, verbal memory, visual memory, executive function, processing speed, psychomotor speed, reaction time, complex attention and cognitive flexibility. In total, 10 normed neurocognitive tests and 26 unnormed tests and over 50 rating scales are available for the researcher’s use.</p> <p>CNS Vital Signs is normed for ages 8-90 and can be given without the supervision of non-clinical staff.</p>
Scoring:	Raw scores, standard scores (M=100, SD=15) and percentile ranks are provided for each domain.
