

Family History Research Diagnostic Criteria (FHRDC)

Availability	This instrument is not commercially available. Please email the author for information about obtaining the instrument: nancy-andreasen@uiowa.edu
Classification:	Supplemental: Traumatic Brain Injury (TBI)
Short Description of Instrument:	The Family History Research Diagnostic Criteria (FHRDC) is an instrument that collects family history information and provides criteria for 12 diagnoses
Psychometric Properties:	Using specific diagnostic criteria leads to greater accuracy and sensitivity, but underreporting remains a major problem of this method.
