Glasgow Outcome Scale-Extended Pediatric Revision (GOS-E Peds)**

Availability	<p>Please visit this website for more information about this instrument. Validity of a pediatric version of the Glasgow Outcome Scale-Extended Please contact Dr. Sue Beers (BeerSR@umpc.edu) to obtain necessary permissions including alteration and translation of the instrument.</p>
Classification:	<p>Supplemental: Mild Traumatic Brain Injury (TBI) and Epidemiology TBI. Basic: Acute TBI and Moderate TBI.</p>
Short Description of Instrument:	<p>The Glasgow Outcome Scale (GOS) is a one item scale with 5 possible ratings - Dead, Vegetative State, Severe Disability, Moderate Disability, and Good Recovery. The Glasgow Outcome Scale Extended (GOS-E) is a revision of the GOS that divides the upper three ratings into upper and lower categories - lower severe disability, upper severe disability, lower moderate disability, upper moderate disability, lower good recovery, upper good recovery. The Glasgow Outcome Scale Extended Pediatric Revision (GOS-E Peds) features a structured interview that is more appropriate for children.</p>
Scoring:	<p>The GOS-E Peds uses the same 8-point scale as the GOSE, but a structured interview appropriate for children is used to arrive at the result on the scale.</p>
Restrictions:	N/A
