PD-DOC Mini Environmental Risk Questionnaire for Parkinson's Disease Patients Baseline
(PD-DOC MERQ-PD-B)

Availability:	Please email the authors for information about obtaining the instrument: CTannerMD@aol.com
Classification:	Supplemental for HD and PD.
Short Description of Instrument:	The Mini Environmental Risk Questionnaire (MERQ) was developed by the Parkinson's Institute as a Parkinson's Disease specific baseline assessment to be used in clinical trials. It has been used in clinical trials to capture patient information pertaining to environmental risk factors that have been associated with Parkinson's Disease.
References:	The questionnaire was supported by NIH/NINDS PD-DOC grant (U01NS050095) and originally developed by the University of Rochester and The Parkinson's Institute.
