Overview

The Parkinson's Disease (PD) Version 2.0 CDE Working Group comprehensively reviewed and updated the PD Version 1.0 CDEs. There have been significant changes to the content of the PD CDE materials in Version 2.0 compared to Version 1.0.

Subgroup Summaries were posted for PD Version 2.0 CDE Subgroups.

New Subdomains: Daily Cognitive Function and Digital Technology were added to the Outcomes and End Points Domain.

The following guidance documents were updated or newly added to the PD Version 2.0 recommendations.

Updated Guidance Documents (3)

1. Imaging Guidance for CDE Use
2. Other Non-Motor Guidance for CDE Use
 - a. Question text was added for corresponding data dictionary.
 - b. C10181 Thermoregulatory sweat test sweat chemical text was removed.
3. Summary of Diagnostic Criteria and Assessments for Psychosis in Parkinson's Disease

New Guidance Documents (3)

1. PhenX Social Determinants of Health Guidance
2. Best Practices for Digital Health Outcomes
3. Guidance for Digital Data Sharing

The following case report forms (CRFs) were updated, removed or newly added to the PD Version 2.0 recommendations. The corresponding data dictionaries (i.e., CDE Detail Reports) have been modified in accordance with the form changes. Population for all CDEs was corrected to Adult, as needed. Notably, there were 9 CDEs added to the list of Core CDEs for all PD studies: C00314 Medical history taken date and time; C08006 Symptoms first appear date and time; C08007 Diagnosis first given date and time; C08008 Diagnostic feature criterion type; C08009 Diagnostic feature criterion presence status; C59020 Diagnosis certainty category; C08012 Motor symptom parkinsonian initial type; C02411 Laterality type; C00023 Hand preference type. C18679 Family history medical condition relative other text was reclassified from Core to Supplemental for v2.0. C08004 Relative type other neurological disorder member number was Core in v1.0 but removed from the v2.0 recommendations.

Updated CRFs (10)

Parkinson's Disease CDE Revision History Document

August 2012 Revisions

Overview

There have been changes to the content and structure of the Parkinson's Disease (PD) CDE materials in Version 1.1 compared to Version 1.0, including the following:

- Every attempt was made to remove duplication and redundancy in the PD CDEs;
- The PD CDEs were harmonized with other large national and international standardization initiatives and efforts [e.g., International Conference on Harmonisation (ICH), Logical Observation Identifiers Names and Codes (LOINC), International Classification of Diseases (ICD), Unified Code for Units of Measure (UCUM)]
- The majority of element names and definitions were improved.
- The permissible values and references of some elements were revised; and
- The version numbers of all forms (excluding standardized scales/instruments) were updated.
- Several guideline documents were reorganized and consolidated to make it easier to understand which standardized instruments/scales are recommended, though the recommendations themselves remained unchanged.
- Some of the forms and guideline documents were re-categorized under a different domain or subdomain to be consistent with other NINDS CDEs.

The corresponding data dictionaries (i.e., CDE Detailed Report) have been modified in accordance with the form changes.
